## Audi connect key

Now is your smartphone for digital car key. Your phone reads the features you know from your Audi key: opening and closing of the vehicle and starting the engine to start your journey.

The Audi connect key works with the Near Field Communication (NFC) technology, a contactless transmission standard. To open the vehicle or close, keep your smartphone that is equipped with this technology directly to the vehicle door handle. Then place the unit in the universal mobile storage in the front center armrest from to start the engine. The functionality of the Audi connect key is in low or empty battery of the smartphone ensured.

You can easily and conveniently pass over the myAudi app on your smartphone up to 5 digital car key to colleagues, friends or family. Thus, a personal delivery of the vehicle key thing of the past. Furthermore, the Audi offers connect a key NFC-enabled card for the event that you need to distribute your Audi quickly - for example with a valet parking.

For the service to Audi connect key can be used, you need a suitable smartphone equipped with Near Field Communication (NFC) technology, as well as an activated and verified myAudi account. In addition, it is assumed that you are the main user of the vehicle for which you connect an Audi want to assign keys. The myAudi app for the award and administration of the digital car key is available on the respective platforms for free.

## MMI radio plus with MMI touch response

- 8.8-inch color display (1280 x 720) incl. MMI touch response with haptic feedback
- Driver information system with 7-inch TFT color display
- 1 SDXC memory card reader
- Audi music interface; 2 USB A connectors with data and charging function
- **Bluetooth interface <sup>10</sup> Handsfree and audio streaming):**  
Bluetooth-enabled mobile phones can be connected via the interface with the vehicle. The following functions are supported:
  - Free calls in the vehicle via the roof microphone and speaker; Connection of telephones 2 (2 x HFP / PBAP)
  - Bluetooth audio streaming (A2DP)
  - Display of incoming text messages and e-mails (MAP)
 Operation via radio / navigation system or multifunction leather steering wheel incl. Voice control for telephone functions
- The remote MMI touch-control panel with 8.6-inch color display (1280 x 640), including MMI touch response with haptic feedback. for controlling the air conditioning functions, as well as the box for handwriting recognition
- Passive speaker; 8 front and rear speakers with 80 watts
- AM / FM phase diversity
- speed-sensitive volume adjustment

○

## MMI navigation with MMI touch response

- **navigation system <sup>10</sup> showing on the 8.8-inch color display (1,280 x 720)**
- additional display of the navigation map and arrow display in the driver information system (7-inch TFT display)
- **map update <sup>11</sup>. Download current navigation data**
- 3D map display with display many attractions and city models
- personal route assistance: monitoring function is activated, the traffic situation on a regular basis all trips - for example between home and workplace - and offering a delay of at least 7 minutes route calculation to avoid traffic jams on..
- Efficiency Wizard: uses the route data from the navigation system and, together with the optional adaptive driving assistants able situational activate with active cruise control freewheel proactively and efficiently on or off. In addition, a haptic warning to be placed on a track with the pace of reduction over the active accelerator pedal ("knock").
- **TMC (traffic information); in conjunction with Audi connect online traffic information <sup>12</sup>**
- MMI Search: Free text search with smart target suggestions as you type
- MMI touch response for fast, intuitive operation - eg. B. destination input via handwriting recognition, and free movement and zoom the map

**MMI navigation with MMI touch response (continued)**

- simple operation of infotainment via natural language interaction 13, 14
- detailed route information: map preview, choice of alternative routes, POIs, track recommendations, highway exits, detailed junction maps and lots more
- Storage of up to 10 intermediate locations
- additionally includes a select portfolio Audi connect infotainment & navigation 7

**MMI navigation plus with MMI touch response**

- in addition to MMI navigation with MMI touch response with the following contents:
- navigation system 10 with representation on a high-resolution 10.1-inch display (1540 x 720)
  - Audi virtual cockpit with 12.3-inch color display, incl. Display of the navigation map
  - Audi sound system with 10 speakers, front and rear, 180 Watt
  - Audi smartphone interface
  - includes the entire portfolio Audi connect infotainment & navigation 7

**Audi virtual cockpit**  
innovative, fully digital instrument cluster for flexible and need-based display of the respective information according to the driver's needs: speed / speed map display, Audi connect services 7, Radio / media information, etc. The VIEW button on the multifunction steering wheel allows change between two different-sized representations of the round instruments. The display with small instruments allows large, vivid graphics of the onboard computer and the MMI content. Configuration from the trip computer values in the tachometer possible. Operating the Audi virtual cockpit is via the multifunction steering wheel. Navigation Chart as 3D terrain model on the high-resolution 12.3-inch full HD color display; permanent display of navigation information in the area of the speedometer when route guidance; incl. break Recommendation

**Personal profiles:**

In your personal profile in the vehicle a variety of settings such as ergonomics, infotainment or may suspension settings. up to six personal profiles and a guest profile can be created via the MMI. The last active profile associated with the vehicle key used when leaving and locking of the vehicle. When the car is unlocked a personal greeting in the Audi virtual cockpit and load the settings of the personal profile, which has been associated with the vehicle key used appears.

The number of stored vehicle settings is dependent on the selected special equipment. There are settings for the infotainment systems, ergonomics (seat, mirror, steering position), interior lighting, climate, audio / sound, driver assistance systems, chassis, light and view, head-up display and instrument cluster stored.

The assistance package City 32 includes assistance functions specifically designed for urban traffic.

## intersection assistant 32

The intersection assistant can warn the driver in complex intersection situations detected approaching cross traffic. The system monitors the forward and lateral vehicle surroundings at intersections and exits by using the sensors installed in the vehicle. are recognized within the system limits approaching moving objects such. As cars. The system can assist the driver in poor visibility intersections and exits and warn with recognized approaching cross traffic of a possible collision.

In critical situations detected a multi-stage warning concept is initiated. First, a visual and audible warning. If the driver reacts to not follow a warning brake jerk. The system operates in the speed range up to 30 km / h and braking jerks be performed up to 10 km / h. The intersection assistant uses radar sensors which are installed in the corners of the front bumper. If present, the information of the cameras around display and the laser scanner be used in addition.

## Assistance package City (continued)

Lane Change Warning <sup>32</sup>

Lane Change Warning helps the driver to monitor the blind spot and the traffic situation behind the vehicle. In this case, 2 additionally detect the rear built radar sensors laterally approaching from behind or mitschwimmende vehicles and measure the distance and the speed difference. When a detected for a lane change as a critical situation, a warning by LEDs on each door mirror is done. Starts the driver by setting the indicator in the system recognizes critical situation a lane change, the warning lights blink 4 times to light. In conjunction with the lane departure warning a corrective steering intervention in critical situations occurs. Even with turning maneuvers, the system can warn within the system boundaries of critical objects.

exit warning <sup>32</sup>

The exit alarm warns when opening the door in the vehicle is stopped before a possible collision with a detected approaching from behind traffic. The system monitors the rear and side vehicle environment within system limits, it uses the radar sensors. be recognized from behind approaching moving objects such. As cars. If the door opening lever is pulled and classified as critical of other road users approaching, the warning bar in the door and the LED indicator will light up on the affected side on the exterior mirror. At the same time the door opening is delayed briefly.

Intersection Assistant behind <sup>32</sup>

The intersection assistant behind can warn of a possible collision with the approach of cross traffic when backing up to 10 km / h. The system monitors the rear and side vehicle environment within system limits, it uses the radar sensors when leaving a parking space. are detected moving objects approaching such. As cars. The system informs the driver visually and can warn addition when reversing into recognized as particularly critical situations by an acoustic signal and by a brake jerk.

## Assistance package City (continued)

### Audi pre sense front<sup>32</sup>

Audi pre sense front uses the data of the front camera and calculates the probability of a collision. It can warn within system limits situation- and speed-dependent impending collisions and initiate appropriate braking. The system is now about 5 km / h running. Pedestrians and cyclists can at speeds up to 85 km / h, vehicles are detected in the speed range up to 250 km / hour: If an impending forward collision detected, the system warns the driver in a multi-level concept optical, acoustic and haptic. If necessary, a brake assist and a full delay can be taken to reduce the speed or to avoid the collision may.

Depending on the driving situation and vehicle following measures can be taken: tensioning of the front and, if present, of the outer rear seat belts, optimization of the seat position, initiating the closing process of windows and panoramic roof glass (if any) and high-frequency driving of the hazard warning system to other to warn road users.

### Audi pre sense rear<sup>32</sup>

Audi pre sense rear uses the data of the radar sensors in the rear of the vehicle and calculated within the system limits the likelihood of a collision with the following vehicle. Case of a detected risk of collision of the vehicle following a preventive protective measures are initiated: tensioning of the front and, if present, of the outer rear seat belts, optimization of the seat position, initiating the closing process of windows and panoramic roof glass (if ordered) and high-frequency driving of the hazard warning lights to other road users to warn.

## Assistance Package Tour

The assistance package tour 18.32 includes a variety of assistance systems that can increase safety and driving comfort in particular intercity and long-distance driving:

### Adaptive Start Assist 32

The adaptive start assist helps the driver to accelerate, brake, holding speed and distance as well as the tracking. Thus, the ride comfort can be increased especially over long distances. The adaptive driving assistant consists of the adaptive speed assistant and the tracking assistant.

The adaptive speed assistant assists the driver by regulating the set speed and the distance to the front vehicle within the system limits. When a preceding vehicle is detected, the adaptive cruise assistant can decelerate or accelerate the vehicle within the system limits. In the stop-and-go Verkehr and storage situations, the system slows to a stop and can approach automates again depending on the duration of the downtime. In narrow areas, the speed can be adjusted to the traffic, so an offset driving is possible, for example in construction sites.

## Adaptive Start Assist 32 (Continuation)

After driver's request, the tracking function can be switched on. The system recognizes within system limits, lane markings, edge cultivations, vehicles on adjacent lanes and several vehicles ahead. From this information, the system derives a virtual driving tube and guides the vehicle in this. Through a supportive steering intervention, the system helps to guide the vehicle permanently in the track center. At the same time the set speed is kept constant and the system reacts to vehicles driving ahead with a distance control. The large number of parameters involved, adaptive Wizard provides a comfortable driving in the possible speed range from 0 to a maximum of 250 km / h in traffic jams.

## overspeed 32

The speed limiter included helps not to exceed a preset maximum speed in manual driving. Per kickdown can temporarily disable the speed limiter mode and the set maximum speed be exceeded. Function is available from 30 km / h.

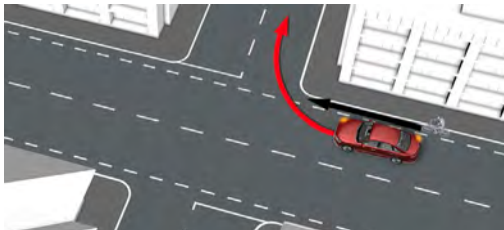

## efficiency assistant 32

The efficiency assistant supports the driver in forward-looking and thus fuel-efficient driving. In conjunction with MMI navigation with MMI touch response, adaptive Wizard uses the data of efficiency wizard for adaptive control of the speed without preceding vehicle. the system to use the stored in the navigation data information to curve radii, town entrances and speed limits. The system is supported by the information from the camera-based traffic sign recognition is also included. Moreover, the efficiency assistant controls targeted Motorschub- and sailing phases, thus promoting a fuel-saving driving of the adaptive driver assistance systems and the cruise control. Advice on efficient driving on display in the driver information system or

## avoidance assistant 32

The avoidance assistant helps the driver in a critical situation, the vehicle around an obstacle herumzulenken. For this, the system uses the data of the laser scanner, the radar sensor and the front camera. the driver deviates an obstacle to an acute warning active, the avoidance assistant by targeted braking of the wheels and applying a small steering torque when correcting the steering angle supports it. The avoidance assistant is available at speeds of between 30 and 150 km / h requires that the driver active during the maneuver directs.

## Blind Spot 32

The turn-off can be prevented by means of a braking intervention that the vehicle collides when turning left with an oncoming vehicle during starting or at low speeds up to a speed of 10 km / h. As soon as the driver activates the turn signal, the turning assistant monitors the oncoming lane. For this, the system uses the data of the laser scanner, the radar sensor and the front camera. The braking engagement causes the vehicle is kept in the same lane. The driver is informed about the procedure by a display in the instrument cluster.

**Lane Change Warning incl. Audi pre sense rear, exit warning and Intersection Assistant behind 32**

The package includes assistance systems for city driving and driving on multi-lane roads. The package includes:

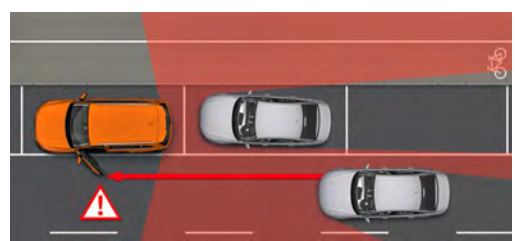

PCH

700, -  
588.24

I

**Lane Change Warning 32**

Lane Change Warning helps the driver to monitor the blind spot and the traffic situation behind the vehicle. In this case, 2 additionally detect the rear built radar sensors laterally approaching from behind or mitschwimmende vehicles and measure the distance and the speed difference. When a detected for a lane change as a critical situation, a warning by LEDs on each door mirror is done. Starts the driver by setting the indicator in the system recognizes critical situation a lane change, the warning lights blink 4 times to light. In conjunction with the lane departure warning a corrective steering intervention in critical situations occurs. Even with turning maneuvers, the system can warn within the system boundaries of critical objects.

**exit warning 32**

The exit alarm warns when opening the door in the vehicle is stopped before a possible collision with a detected approaching from behind traffic. The system monitors the rear and side vehicle environment within system limits, it uses the radar sensors. be recognized from behind approaching moving objects such. As cars. If the door opening lever is pulled and classified as critical of other road users approaching, the warning bar in the door and the LED indicator will light up on the affected side on the exterior mirror. At the same time the door opening is delayed briefly.

**Intersection Assistant behind 32**

The intersection assistant behind can warn of a possible collision with the approach of cross traffic when backing up to 10 km / h. The system monitors the rear and side vehicle environment within system limits, it uses the radar sensors when leaving a parking space. are detected moving objects approaching such. As cars. The system informs the driver visually and can warn addition when reversing into recognized as particularly critical situations by an acoustic signal and by a brake jerk.

**Audi pre sense rear 32**

Audi pre sense rear uses the data of the radar sensors in the rear of the vehicle and calculated within the system limits the likelihood of a collision with the following vehicle. Case of a detected risk of collision of the vehicle following a preventive protective measures are initiated: tensioning of the front and, if present, of the outer rear seat belts, optimization of the seat position, initiating the closing process of windows and panoramic roof glass (if ordered) and high-frequency driving of the hazard warning lights to warn other road users.

# assistance systems

		How to order	A7 Sportback
<p><b>Night vision assistant 32</b></p> <p>The night vision assistant improves difficult visibility in the dark by electronic visualization of the road environment. The system supports the driver when driving at night, using a thermal image of the environment is displayed. Recognized persons and larger wildlife are highlighted in yellow in the driver information system. Is determined from its movement and position of a possible hazard, the mark changes to red, a warning triangle is displayed and an acoustic alarm. In combination with one of the following light systems, a marked person is additionally briefly illuminated by a headlight 3 times successively (marker light):</p> <ul style="list-style-type: none"> <li>• HD matrix LED headlights</li> <li>• HD matrix LED headlights with laser light</li> </ul> <p>In the dark, the system automatically switches on if the low beam is activated or the rotary light switch is in the AUTO mode. <b>Audi drive select</b>	<p>Adjusting the vehicle characteristics in the available modes car, comfort, dynamic, efficiency and lift (for vehicles with adaptive air suspension) as well as individual by adjusting the steering assistance motor characteristics or switching characteristics, damping control, adaptive air suspension and adjusting further optional equipment. The efficiency mode offset engine, transmission, air-conditioning and the optional adaptive cruise control and the speed control system in a basic setting verbrauchsverbesserte.</p>			○

# Suspension / brakes

		How to order	EUR incl. 19% VAT.2 EUR excluding VAT.2	A7 Sportback
<b>quattro</b>	<p>quattro is distinguished by excellent traction, driving dynamics and high safety.</p> <p><b>quattro with ultra-Technology</b></p> <p>permanently available all-wheel drive with active torque distribution controlled, ultra-technology and torque vectoring. The intelligent quattro strategy permanently monitors the driving condition and distributes the drive torque depending on the situation on the front and rear axles. The system includes an electronically controlled all-wheel drive coupling, is integrated in the rear differential frictional clutch, and an electronic differential lock (EDS) for all driven wheels. The ultra-technology allows both clutches by opening a reduction of the drag losses in the all-wheel drive train. Requires a driving situation no wheel drive, the complete Hinterachs-antriebsstrang can be decoupled. Overall efficiency and effectiveness of the drive to increase accordingly. The integrated into the ESC torque vectoring brakes during sports turning, the inside wheels gently and therefore increases the drive torque to the outer wheels. This means improved dynamics in cornering and more precise and neutral handling.</p>			○
<b>progressive steering</b>	<p>increases driving dynamics and comfort through a more direct steering behavior (e.g., on winding roads, or when turning.) and by a reduced steering effort (for example when parking and maneuvering.); impressive handling by a dependent on the steering angle steering ratio and speed-dependent steering assistance; different modes, adjustable via Audi drive select</p>			○
<b>Dynamic all-wheel steering</b>	<p>The momentum-wheel steering combines the advantages of dynamic steering and four-wheel steering. The momentum-wheel steering supports the driver by active steering interventions at the front and rear axle. The dynamics of the vehicle is increased over the entire speed range. At low speeds is reduced to the driver of the steering effort and the turning radius of the vehicle is reduced by steering the rear wheels in opposite directions. The maneuverability of the vehicle is increased. At higher speeds, the steering angle at the front and rear axle (same direction steering) to improve the response and the driving stability by a targeted adjustment. the driver's steering movements to be implemented quickly and accurately. Tropic reduction of about 1.1 m</p>	0N5	1900, - 1,596.64	I

# Technology / safety

		How to order	EUR incl. 19% VAT.2	EUR excluding VAT.2	A7 Sportback
<b>Mild hybrid</b>	<p>Mild hybrid technology allows the acquisition of hybrid functions in conventional engines. A belt starter generator (RSG) and an additional lithium ion battery enable a reduction in consumption / CO<sub>2</sub>Einsparung by increased regenerative braking and by switching off the internal combustion engine during the drive below 160 km / h (emission-free sailing). By a permanent connection of the RSG to the engine, a convenient, low-vibration engine start is achieved. The start / stop operation can be used up to a speed of 22 km / h. The engine electronics associated equipment-dependent various electronic systems - for example, sensors for traffic ahead or navigation data - to matching the driving situation coasting mode.</p> <p>Depending on engine / vehicle: For motors with 6 or more cylinders, a 48-V power supply is used, which is a basis for the further electrification of the vehicle with power-intensive suspension systems.</p>				<input type="radio"/>
<b>Start-stop system</b>	helps the fuel consumption and CO <sub>2</sub> emissions by switching off the engine prior to reduce in stages, for. As at traffic lights. For a restart of the starting process is initiated when releasing the foot brake. deactivated at any time via a button				<input type="radio"/>
<b>S tronic (four-wheel)</b>	Double clutch transmission with seven forward gears for vehicles having longitudinally mounted engines. The structural design and selection of materials made in view of lightweight construction and improvement of efficiency. By adapting to the engine 2-mass flywheel, the transmission allows an efficient and comfortable driving in the low speed range. The electronics gives the operator more comfort-and efficiency-oriented features such as free-wheeling mode, automatic actuation of the parking brake or the use of individual drive programs.				<input type="radio"/>
<b>Fuel tank (63 liters)</b>	Fuel tank for 63 liters of petrol				<input type="radio"/>
<b>Fuel tank (73 liters)</b>	Fuel tank for 73 liters of petrol		0M5 without surcharge		<input type="radio"/>
<b>safety steering column</b>					<input type="radio"/>
<b>airbags</b>	Full-size airbags for driver and passenger				<input type="radio"/>
<b>Front side airbags incl. Kopfairbagsystem</b>	Side airbags integrated into the seat back; with additional Kopfairbagsystem: unfolds over the side windows surface and can thus protect the front and outer rear passengers in a side impact				<input type="radio"/>
<b>Deactivation switch for passenger airbag</b>					<input type="radio"/>
<b>Bandages, warning triangle and reflective vests</b>	The first aid kit is located in the left side compartment of the luggage compartment. The warning triangle factory supplied is located in the tailgate. The vests factory-supplied are located in the storage compartment in the driver's door.				<input type="radio"/>

## **Audi connect infotainment & navigation**

The ultimate connection. Directly from the Internet: The term Audi connect combines all the applications and developments that present and future Audi models with the Internet, the owner and the infrastructure connecting. With Audi connect you benefit, for example, thanks to most current traffic information from the Internet, from a significantly improved route planning. Audi connect creates infotainment and entertainment functions and raises comfort and the joy of automobiles to a new level. With Audi connect easily in the MMI to any POI search, retrieve the latest news and the current weather forecast for the planned navigation destination. Rear passengers to important information with laptop, tablet or other mobile devices via the Wi-Fi hotspot

For Austria, Denmark, Belgium, France, Germany, Ireland, Italy, Luxembourg, Netherlands, Spain, Switzerland, Sweden, the UK applies: The provision of services via a permanently installed in the vehicle SIM card. The cost of data connections are included in the price of services. The only exception is the data connection for the Wi-Fi hotspot, using the services online radio and hybrid radio and online media streaming and other, via a smartphone app Audi offered services.

The data connection is for the Wi-Fi hotspot, using the services online radio and hybrid radio and online media streaming and other, offered via an Audi SmartphoneApp services also via the permanently installed in the vehicle SIM card and a paid data plan of the Audi provider, For information on rates and bookings at [www.audi.de/myaudi](http://www.audi.de/myaudi).

Is still a remote SIM card inserted into the card slot, all data connections are made (for Audi connect services and WLAN) via this SIM card. Any resulting costs borne by the customer. A refund of the costs by Audi is excluded.

For not listed above European countries applies: You will also need a SIM card with data option and use of LTE with LTE option. For the external SIM card, a card reader located in the surround of the MMI navigation with MMI touch response. The services are available only with an existing mobile phone contract or into separately and only within the coverage of the cellular network. can additional costs from your wireless service plan, and particularly when operating abroad by receiving data packets from the Internet dependent. Due to the high volume of data using a data plan is strongly recommended.

### **Navigation with Google Earth™**

Navigation with Google Earth™ simplifies the orientation by high-resolution aerial and satellite images.

### **Traffic information online**

Learn more. Faster arrive: the traffic information online the fastest route get to the goal!

Traffic flow information is color displayed on the navigation map and included in the dynamic route guidance. A continuous data update provides quick information on traffic jam formation and dissolution. The high coverage of the road network z. As well as on country roads and in the city. Audi connect - the fast way to your destination

### **myAudi navigation**

Destination search and route guidance at any time directly on the smartphone. Route guidance is seamlessly and comfortably passed when starting the vehicle to the vehicle navigation and continued there. When leaving the vehicle the smart phone resumes automatically the route guidance, and performs the last steps up to the destination. Furthermore synchronize all targets stored in the vehicle and on your phone, no matter where the goal was originally stored. For example, routes and all tours can be conveniently planned before driving on the smartphone and then taken in the vehicle directly as a navigation destination. If, on one of the usual journeys to delays or traffic problems, be proactive messages displayed on the smartphone.

---

## **Audi connect infotainment & navigation 15**

(Continuation)

### **Predictive routing**

The route calculation is based on current and expected future traffic. Calculates the best route to the destination, avoiding traffic jams and provides a more accurate assessment of expected arrival time

### **Advanced Point-of-interest display (POI)**

direct access from the navigation on POIs from Yelp and other sources such as gas stations and parking garages. If required, also dynamic additional information such as Yelp reviews and opening times, current fuel prices and the availability of parking spaces can be displayed.

### **Advanced 3D City view**

better orientation thanks to detailed 3D building models

### **hazard information**

The warning of danger points based on swarm data and the car-to-X technology. Here danger spots such as accidents or breakdowns are automatically detected by the vehicle sensor, transmitted to the audio server and passed on from there immediately to other Audi drivers. The so identified potential risks are displayed in the navigation system and the instrument cluster. The system warns of accident and breakdown points and against hazardous weather conditions such as fog or black ice.

### **Traffic signs information**

Always the current speed limit display in the MMI navigation with Audi connect traffic signs information. In combination with the optional camera-based traffic sign recognition speed limit display can be independently detected by the vehicle sensors and transmitted for deviations to upgrade the map anonymously to an audio server.

The detected by the Audi fleet traffic signs are provided to all vehicles equipped with the Audi connect services traffic signs information about the navigation card.

### **Online radio**

Access to worldwide available online radio stations, direct and comfortable as a media source in your radio

### **hybrid radio**

The radio automatically and seamlessly switches between classic broadcasting via FM or DAB and the matching online radio stream radio station to always ensure the best possible reception. Anytime and anywhere listen to favorite stations, even when leaving the terrestrial broadcast range

### **Point-of-Interest (POI) search with voice control**

Networked navigation thanks to Audi connect: The point-of-interest search with voice control makes the ride into an interactive experience. Access to the full range of comprehensive Internet database allows you to search for points of interest by free text and provides matching information such as pictures, opening times and user rating. The integrated and comfortably operated by pressing a button on the multifunction steering wheel Voice recognition offers even more comfort and safety.

**Point-of-interest search with voice control - the goal firmly in mind during the journey. With the app myAudi 16, 17 You can use mobile on your phone, the point-of-interest search.**

# Audi connect

---

## **Audi connect infotainment & navigation 15**

(Continuation)

### **travel information**

There is plenty to see, with the travel information such as Audi connect learn more about the current environment, the destination, or any place. A search engine provides you with professionally edited information on sights that can be used directly as a navigation destination.

### **Weather**

Know what the weather will, no matter where the journey leads. Audi connect supplies to tailor information like weather forecasts and storm warnings are presented with vivid charts and weather maps. So the weather can be hours accurately predicted for the next 2 days or displayed using the rain radar.

The weather information such as weather alerts and weather environment can also be integrated into the navigation map.

### **Wi-Fi hotspot**

Audi connect enables a wireless internet access via Wi-Fi hotspot. So you can get comfortable, or simply surf the Web while driving in the rear or in the state via a mobile terminal information and e-mails.

### **Online media streaming 16, 18**

The individual music channel anywhere - no matter at what location, whether on holiday or at home: with the available for some smartphones applications MMI Audi connect or Audi music stream. Simply connect using their own phone via Wi-Fi with the MMI navigation with MMI touch response and access a wide range of worldwide radio stations. The transmitters can by genre or selected via free text search, and can be - saved as favorites in the smartphone - find quickly. Convenient operation through integration into the Audi MMI Navigation with MMI touch response. And if nothing works exceptionally for personal taste in radio: simply via the MMI wirelessly to the stored locally in the smartphone music access, select the desired hit and play.

### **news online**

Go quickly informed. Travel relaxed and still not miss the current events; with Audi connect also be traveling constantly informed. Renowned national and international editors provide texts and pictures about current world events are available. And provided that the respective provider supports the offer, the messages in the selected language are displayed in a results list. The messages can be played using read-aloud function comfortably and safely while driving. At the request of detailed text can be displayed on the MMI. An optimum combination of features for every situation.

### **Fuel prices**

Find Cheap gas stations in your area or at your destination. For efficient stopping by price or distance

### **Access to Twitter**

Never even a novelty miss thanks to Audi connect and Twitter: The current events, such as the News Feed or trends can be tracked easily using the built-in read-aloud function.

---

## **Audi connect infotainment & navigation 15**

(Continuation)

### **Messages**

**Take dictation: The function messages short messages (SMS) can easily and quickly be sent - without having to pick up the phone in his hand. Simply "dictate SMS" provide information on the voice input command and the system dictate the desired text 16, 36m. For safety, the text is then displayed on the display of the MMI navigation with MMI touch response and can be corrected directly by voice or via the MMI touch response or extended. "Read message" with the voice command can listen to received messages and answer immediately.**

### **e-mail 19**

**Stay informed: The e-mail function transfers via Bluetooth e-mails from the mobile phone in the vehicle. Upon request, the driver can also read the contents - including sender, subject, time stamps, credit and disclaimer. After opening or reading the email is "read" in the mobile phone as shown. It is also possible to write emails through pre-text blocks and enter and send.**

### **calendar**

**Anytime access to the calendar of your smartphone. With Audi connect service calendar in the app myAudi 16, 17 You can view your upcoming appointments comfortably in the MMI when your smartphone via WLAN is connected to the vehicle. Transfer the address of the next meeting directly from your calendar into the navigation system. So you can always at the right time in the right place (address must be stored in the date) be.**

### **country facts**

Display of country-specific information, such. As to all speed limits, etc. vignette at border crossings

### **Parking Information**

Parking without stress - even in foreign cities: simple search for free parking and parking garages in your area or at your destination and adoption as a navigation destination; Display of parking including detailed additional information such. B. pricing, and currently free parking

### **Travel**

**provides detailed information on attractions, restaurants, bars, cafes, hotels, shopping and much more, allowing intelligent search at any location with multiple filter options in the vehicle and in the myAudi app 16, 17m. Destinations can be conveniently of Mark at home or on the road via the myAudi app and later take over the vehicle as a navigation destination. Build your own favorite folder, whether for planned excursions or personal favorite travel destinations. In the vehicle, you can use the convenient voice control and the message reader.**

---

**Legal to Audi connect infotainment & navigation** The use of supported Audi connect services is possible only in conjunction with an optional navigation system. Execution of the Audi connect services is effected by

AUDI AG / importers. The data connection for the Audi connect services is established via a permanently installed in the vehicle SIM card through a wireless service provider. The cost of these data connections are included in the price of the Audi connect services. The only exception is the data connection for the Wi-Fi hotspot, using the services online radio and hybrid radio and online media streaming and other, via a smartphone app Audi offered services. The data connection is for the Wi-Fi hotspot, using the services online radio and hybrid radio and online media streaming and other, an Audi smartphone app offered services also via the permanently installed in the vehicle SIM card and a paid data plan of Audi provider. For information on rates and bookings at [www.audi.de/myaudi](http://www.audi.de/myaudi).

# Audi connect

---

## Legal to Audi connect infotainment & navigation (continued)

Alternatively, a customer-specific external SIM card into the card slot can be inserted for making a data connection. In combination with the optional features Audi phone box also a Bluetooth-capable phone with remote SIM access profile is to use the built-in car phone function (rSAP) » get connected. If an external SIM card inserted into the card slot or connected via rSAP, all data connections for both the Audi connect services and the WiFi hotspot about this external SIM card are made. The billing of the costs incurred are then exclusively via the external SIM card.

The availability of features supported by Audi connect infotainment & navigation services varies by location. The Audi connect services are made available for at least 1 year after vehicle delivery. After 24 months of vehicle delivery, the term of the Audi connect services extended free of charge once for 12 months. If you do not want such an extension, please inform in writing to the following address with:

AUDI AG  
Customer Care Germany 85045 Ingolstadt Email:  
kundenbetreuung@audi.de Tel.: +49 800  
28347378423

Over subsequent possibilities of extending the Audi connect services please contact your Audi partner. Audi connect provides access to the services of Google and Twitter depending on the vehicle model. A permanent availability can not be guaranteed, but is up to Google and Twitter. For more information on Audi connect is available at [www.audi.de/connect](http://www.audi.de/connect) and your Audi partner, information on tariff conditions with your carrier.

---

## Audi connect Emergency & Service incl. Vehicle control

### Emergency call

In the event of a serious accident, an emergency call is automatically triggered. Using the transmission of vehicle-related data such as accident or the number of occupants to the Audi emergency call centers can be organized as quickly as possible and targeted assistance. Trained call center agents take care of the casualty and abroad in the national language of the driver and inform parallel local emergency personnel with the relevant data to the rescue. The emergency call can be triggered manually via a button, such. As to call for help for other road users.

### Online breakdown call

In the event of a breakdown, the customer can trigger the breakdown call online through the service call button in the roof module. The vehicle establishes a voice connection to Audi aid. In many cases, the complaint can be identified based on the data sent from the vehicle and a fast, customer-adequate solution be found.

### Audi claims service

Put the vehicle sensors a minor accident without airbag deployment and / or belt tightening firmly, the customer is automatically the Audi claims service informed. It opens to a mask on the MMI display, which provides the customer to choose whether he wants it or assist in the claims processing an emergency call to be triggered. In both cases, the customer has a specially trained service employees.

### Audi service appointment online

Audi service appointment online informs the customer selected Audi service partner for outstanding service appointments. The customer will be proactively contacted by the service's preferred partner.

## **myAudi app** <sup>16, 17</sup>

The myAudi app contains many useful features for your Audi connect services (the functionality depends on the selected equipment in the vehicle).

The myAudi app allows among others:

- the management of Audi connect key
- **Navigation functions such. B. myAudi navigation including traffic information online <sup>12</sup> Synchronization of all objectives, first- and last-mile navigation, tours and predictive navigation**
- the use of the Audi connect vehicle control, eg. B. Status Report vehicle, locking and unlocking, parking position, remote control heating, notifying theft warning system

# Explanations

**1 The fuel consumption and CO<sub>2</sub> emissions of a vehicle not only depend on the efficient utilization of**

Fuel by the vehicle, but are also influenced by driving style and other non-technical factors. CO<sub>2</sub> is mainly responsible for global greenhouse gas. The values given were determined according to the prescribed measuring procedures. The figures do not refer to a specific vehicle and are not part of the offer but are purely for comparison purposes between the various types of vehicle.

**2 Manufacturers suggested retail price, plus, transfer and registration costs.**

**3 Sheen, gloss machined, polished or partially polished aluminum wheels are not allowed in wintry road conditions**

nissen be used. The rim surface does not have sufficient corrosion protection due to manufacturing and can be permanently damaged by road salt or the like.

**4 Please use the exact For information on your Audi partner.**

**5 For information on compatible mobile phones (requires, among other things Android operating system, NFC technology, Secure**

Element integrated in the phone SIM card with secure element required), please contact your Audi partner or visit [www.audi.de/bluetooth](http://www.audi.de/bluetooth).

**6 Verification of your account myAudi Audi partner necessary.**

**7 Legal information and usage instructions can be found on pages 62-67.**

**8 The use of head-up displays is limited with polarized sun glasses.**

**9 For information on compatible mobile phones, please contact your Audi partner or visit [www.audi.de/bluetooth](http://www.audi.de/bluetooth).**

**10 Navigation data for supported countries on integrated SSD storage available. For further information contact**

your Audi partner.

**11 The delivered maps version can on a quarterly basis up to 5 years after the end of production of comparable**

built infotainment generation of devices will be updated free of charge. The current navigation data are provided on the myAudi platform under [www.audi.de/myaudi](http://www.audi.de/myaudi) for download and can be installed via SD card in the vehicle. In conjunction with Audi connect, the cards can also be downloaded directly in the vehicle and updated. Moreover, it is possible to install the new navigation data on an Audi partner, with additional costs.

**12 The Audi connect services traffic information online is available for many countries available. For more information ER-**

keep your Audi partner.

**13 Available in selected languages.**

**14 Availability varies by location.**

**15 IT1 requires its own SIM card, IT3 includes an integrated SIM card. The Audi connect services need to**

3 years be extended with costs.

**16 Depending on country-specific availability.**

**17 Compatible with Apple iOS and Android 10.0 6. Previous registration under [www.audi.de/myaudi](http://www.audi.de/myaudi) required. active**

Wireless connection between your phone and Audi MMI for online media streaming necessary.

**18 To use, you usually need an account with a media streaming service, so that additional cost**

may arise.

**19 Provided the mobile phone has Bluetooth profile MAP (Message Access Profile). Information about compa-**

tible mobile phones please contact your Audi partner or visit [www.audi.de/bluetooth](http://www.audi.de/bluetooth).

**20 Google and the Google logo are registered trademarks of Google Inc.**

**21 Reception depends on local digital network availability.**

**22 The content and scope of the additional information depend on provision by the respective radio stations.**

**23 The smart card to use the scrambled channel is not part of the equipment.**

**24 please about the countries availability check with your Audi partner.**

**25 For information on compatible mobile phones, please contact your Audi partner.**

**26 Audi has no control over which applications are shown on the Audi smartphone interface. For the**

within the applications displayed contents and functions are the providers responsible.

**27 Prior notification and activation of function under [www.audi.de/myaudi](http://www.audi.de/myaudi) necessary.**

**28 The Audi connect vehicle control services are available free of charge from vehicle delivery for 3 years and can turn**

be extended closing costs.

**29 Engine start without ignition key is not possible.**

**30 Only in conjunction with the optional heater.**
