# Light

Order Code	EUR inkl. 19 % MwSt.2 EUR WITHOUT MwSt.2	A8 6-Cylinder	A8L 6-Cylinder
		○	○
		○	○

## HD Matrix LED spotlight with dynamic flashing light

Daytime running lights, low beam, high beam, position light, dynamic front and rear light, cornering light, All-weather light, highway light, static curve light, dynamic curve light, automatic dynamic dynamic range control and crossing light The new multi-line HD Matrix LED headlamp allows precise illumination of the road, both in the low-beam range as well as high beam. The automatic-dynamic lighting control provides more comfort and safety, without dazzling other traffic users: A camera detects light sources of averaging or controversial Road users. Depending on their position, the vehicle speed, as well as other ambient and traffic conditions Traffic, individual segments of the main beam are automatically switched on or off. So the environment always optimally illuminated, without the driver having to intervene in the light setting. Including headlight cleaning system.

## LED rear lights with dynamic flashing light

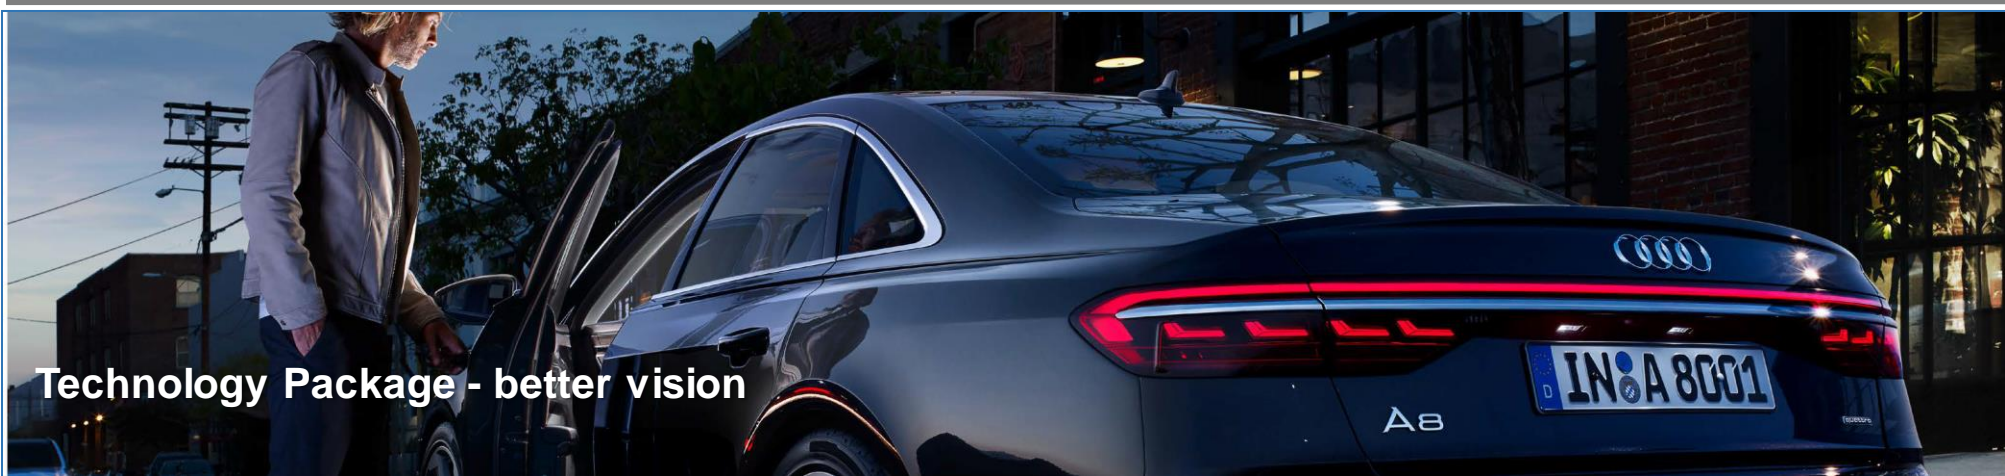

LED technology of the rear lights enables the earlier activation due to the faster activation. Traffic; dynamic course of the flashing light by segment-wise control of the LED light strip (sequential turn signal).

● = as special equipment available ○ = standard equipment - = no offer For explanations of the footnotes, see page 65.

# Light

------------	---------------------------------------------------------	---------------	----------------

WDC	5,800.00 4,873.95	●	●
-----	----------------------	---	---

## Technology Package - better vision

HD Matrix LED headlights with Audi laser light

The laser light increases the range of the front lights: the Audi laser light supplements the LED high beam of the Matrix-Headlights from a speed of about 70 km / h and brings a noticeable plus of safety and comfort the almost twice as large range.

OLED rear lights

The innovative Audi OLED technology of the rear lights offers a new kind of light design due to the very homogeneous illumination and enables dynamic lighting staging of the Coming Home / Leaving Home function.

Adaptive windshield wipers with integrated wash nozzles

Adaptive windshield wiping system for clear vision even during the wiping process: cleaning fluid will vary depending on the type of application. Wiping direction is sprayed directly in front of the wiper blades and wiped without delay, heated.

Night vision assistant 4

The night vision assistant improves difficult visibility in the dark by electronically visualizing the road surface. The system supports the driver at night time by displaying a thermal image of the environment. Recognized persons and larger wild animals are marked in the Audi virtual cockpit yellow. Will be out of their movement and position. If a possible hazard is detected, the marking changes to red, a warning triangle appears and an acoustic signal appears Warning sounds. A marked person is additionally briefly illuminated by the headlight 3 times. Display the warnings also in the optional Head-up Display<sup>7</sup>
