

Components

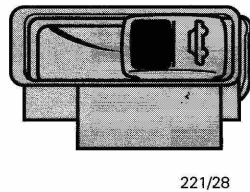

Parking Brake Warning Lamp Switch F9

The Parking Brake Warning Light Switch informs the Convertible Top Control Module whether or not the parking brake is applied.

The convertible top cannot be raised or lowered unless the parking brake is applied.

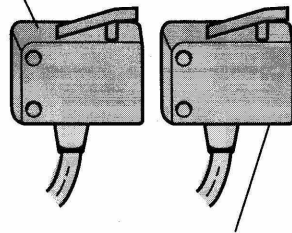

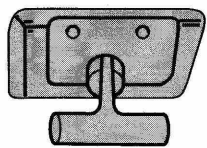

Convertible Top Operation Switch E137

Convertible Top Operation Switch - E137 - signals the Convertible Top Control Module that the driver wishes to lower or raise the top. The control module then checks the other operation parameters to see if the top will be permitted to operate.

Convertible Top Latch Open Position Switch (Top Latch) F205

Top Latch

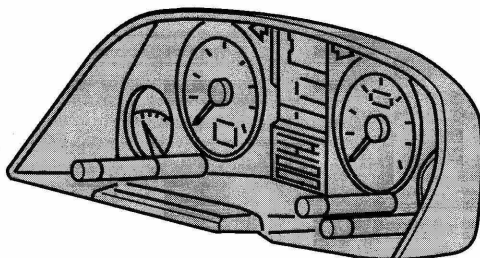

Convertible Top Front Lock Switch F172

Convertible Top Latch Open Position Switch - F205 - informs the Convertible Top Control Module the Top Latch has been opened.

Convertible Top Front Lock Switch - F172 - informs the control module the top has lifted off the roof frame.

Vehicle Speed Signal from G21 via G28

A vehicle speed signal is sent from Speedometer - G21 - to the control module. The top cannot be lowered or raised while the vehicle is in motion.
