Map update

Digital road map North America (Mexico, Canada, USA) Version 2018

- Complete package** You can download the complete package here
- Individual country package** Please select 

 **Please note the following:**

1. The latest map updates can be downloaded here free of charge and then installed in the vehicle via SD card. You can download and install the updates an unlimited number of times. The Map Update includes the first five updates to the version of the map installed at the factory. The updates are issued every six months.
2. Transferring the new map package overwrites the map package currently stored in the MMI. The currently installed version can be found in the MMI under -> Setup MMI -> Version information -> Navigation database country versions.
3. You can also have the new map data installed by an Audi dealer (there would be a charge for this service).
