Highlights

Key Attributes

Audi connect with online services* Audi connect™ makes it easy to search for any point of interest on Google™. Plus, you can enjoy realistic Google Earth™ terrain imagery & even send destinations from any browser right to your Audi. This feature is included when MMI® Navigation plus is ordered.

Audi adaptive cruise control* Audi adaptive cruise control on the Q5 helps the driver to take command over even more of the driving experience, as its long-range radar measures the distance to the vehicle ahead, sends its data to a computer that weighs the information against velocity & other road variables & applies the brakes as necessary. Once the road is safe to cruise, the Q5 effortlessly accelerates back to its desired speed.

Audi drive select* Exclusive to Audi, this optional system provides advanced control of the vehicle's adaptive suspension, dynamic steering, transmission shift characteristics & engine response. The system offers distinct driving configurations, allowing drivers to configure vehicle drive characteristics exactly to their liking with their choice of Comfort, Auto, Dynamic or Individual settings.

Audi side assist* Monitors the blind spot areas, as well as fast-approaching vehicles, at a range of about 150 ft. to the rear of the car. If Audi side assist identifies another vehicle, it informs the driver via LED lights in the exterior mirror.

ESP w/ roof rail cross bar detection* The roof rack detection system in the Audi Q5 is directly linked to the Electronic Stabilization Program (ESP®) control unit. When the crossbars are installed, a signal is sent that adjusts driving-dynamic relevant parameters according to the center of gravity. When the crossbars are not installed, the ESP® program adjusts dynamics to allow for more enthusiastic driving.

Thermo cupholder* The specially designed thermo heated/cooled cup holder helps maintain the desired temperature of your beverage with the touch of a button.

*Audi Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle's electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested Audi Navigation plus route. Periodically mapping updates will be available for purchase at an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details. **See back cover for important information regarding required SiriusXM subscriptions.

Standard & Optional Equipment

Safety/Security	2.0T	3.0T	TDI	hybrid	SQ5
Anti-lock Brake System (ABS) w/ Electronic Brake-pressure Distribution (EBD) & brake assist	■	■	■	■	■

1 Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy, or icy weather conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you use the recommended winter or all-season tire specified for your car or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that the inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices.
